Information for electrical contractors, architects and consulting engineers

April 2011

New Underground Dip Rates

The board approved new rates for underground dips (underground service in overhead areas) effective April 1st as follows.

200 amp, 120/240 volt, 3 wire underground dip - \$750.00

320 amp, 120/240 volt, 3 wire underground dip - \$800.00

Customers are required to install secondary conduit from the overhead service pole or pedestal to the meter. Please contact your area electrical service designer to obtain specifics regarding duct installation and other details related to each project to avoid any delays or conflicts.

A residential underground dip checklist can be found on OPPD's website. Go to www.oppd.com and click on the Contractors & Developers tab to get to our Reference Library.

We value your partnership in providing electrical service to our customer owners. We also welcome your feedback. Email us at Contactoꝛ@oppd.com.
