Independent Auditor's Report

Board of Directors
Omaha Public Power District
Omaha, Nebraska

We have audited the accompanying financial statements of the Omaha Public Power District Other Post Employment Benefit Plan (the Plan), a component unit of Omaha Public Power District, as of and for the years ended December 31, 2019 and 2018, and the related notes to the financial statements, which collectively comprise the Plan's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position as of December 31, 2019 and 2018, and the changes in fiduciary net position for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the other postemployment information as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. Our opinion on the basic financial statements is not affected by this missing information.

OMAHA PUBLIC POWER DISTRICT OTHER POSTEMPLOYMENT BENEFIT PLAN

(A Component Unit of the Omaha Public Power District)

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2019 AND 2018

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting—The financial statements of the Omaha Public Power District Other Postemployment Benefit Plan (the “Plan” or “OPEB Plan A”) are prepared in accordance with accounting principles generally accepted in the United States of America. The financial statements of the Plan have been prepared in accordance with Governmental Accounting Standards Board (“GASB”) Codification Section Po50, Postemployment Benefit Plans Other Than Pension Plans – Defined Benefit. Omaha Public Power District (“OPPD”) is not subject to the Employee Retirement Income Security Act (“ERISA”) of 1974. The Plan is a fiduciary component unit of OPPD.

Method Used to Value Investments and Income Recognition—Investments are reported at fair value. Investments in securities traded on a national securities exchange are valued at the last reported trade price on the last business day of the year. Purchases and sales of securities are recorded on a trade-date basis. Realized gains and losses on sales of investments and unrealized appreciation and depreciation in fair value of investments are based upon beginning of year market values, or cost if acquired during the year. Dividend income is recorded on the ex-dividend date.

Contributions—Employer contributions are recognized when both the related employee services have been rendered and the employer has made a formal commitment to provide the contributions. Contributions received by the Plan prior to services being rendered are recorded as unearned contributions on the statements of plan net position.

Benefits—Benefit expenses are recognized when due and are paid in accordance with the terms of the Plan. Benefits are recorded net of member premiums.

Expenses of the Plan—Expenses such as trustee fees and investment management fees for investments are deducted from investment income. Administrative expenses consist of consulting fees, audit fees and attorney fees.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of plan net position and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties—The Plan may utilize various investment instruments, including U.S. government securities, corporate bonds and other debentures, mutual funds, preferred and common stocks and collective investment funds. Investment securities, in general, are exposed to various risks, such as interest rate, credit and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Comparative Data - Certain amounts presented in the prior year data have been reclassified in order to be consistent with the current year presentation. These reclassifications had no effect on net change or net position.

2. PLAN DESCRIPTION

General—The following description of the Omaha Public Power District Other Postemployment Benefit Plan is provided for general information purposes only. Participants should refer to the Plan agreement for a complete description of the Plan’s provisions.

The Plan provides postemployment health care benefits to retirees, surviving spouses, employees on long-term disability and their dependents and life insurance benefits to retirees and employees on long-term disability. The Plan is a single-employer defined benefit plan. The Plan was established and may be amended at the discretion of Omaha Public Power District’s Board of Directors and is administered by OPPD. The Board of Directors performs the duties of a governing board for the Plan.

Substantially all full-time employees of OPPD participate in the Plan. Membership in the Plan consisted of the following at January 1, 2019 and 2018, respectively:

	2019	2018
Plan members receiving benefits	1,995	1,933
Active plan members	<u>1,762</u>	<u>1,828</u>
Total	<u><u>3,757</u></u>	<u><u>3,761</u></u>

There is a separate Other Postemployment Benefit Plan for the employers’ share of health care premiums for members hired after December 31, 2007 (“OPEB Plan B”). OPEB Plan B is officially named the Retirees’ Medical Coverage Premium Plan for Employees Hired after December 31, 2007 and is commonly referred to as the Retirees’ Medical Premium Plan. The benefits from OPEB Plan B and the OPEB Plan B members’ contributions for their premium share are included in this Plan and are used to offset health care claims and expenses. Members hired after December 31, 2007, are included in the membership count as their postemployment life insurance benefits are provided from the Plan. OPEB B had 772 and 709 members at January 1, 2019 and 2018, respectively.

Plan Benefits—Qualifying retirees, surviving spouses, employees on long-term disability and their dependents are eligible for health care benefits. The requirements for retirement eligibility under OPPD’s retirement plan determines when Plan members are eligible for medical benefits. OPPD is self-insured for health care

benefits. Benefits are based on the coverage elected by the Plan members. Plan members are required to pay a premium based on the elected coverage and their respective premium cost share. OPPD's self-insured Medical Plan becomes a secondary plan when the members are retired and eligible for Medicare. Commencing in 2014, Medicare Supplement and Part D Plans were available for post-65 medical coverage instead of OPPD's self-insured Medical Plan. Effective January 1, 2019, the Medicare Supplement Plan was replaced with the Medicare Advantage plan, which includes a Part D drug plan. Life insurance benefits are provided for the Plan members only. For life insurance, coverage is purchased from a third party. Life insurance benefits are based on one and one-half times the participant's base salary at the time of retirement until age 65. At age 65, the benefits are reduced to \$20,000 if retired on or after June 1, 1996 or \$15,000 if retired prior to June 1, 1996.

Contributions—Member contributions consist of their premium share for postemployment health care benefits and are based on the elected coverage. Member contributions also include any benefits transferred from OPEB Plan B. Employer contributions to the Plan are actuarially determined, and the actuarially determined contribution ("ADC") was fully funded in the amount of \$20,621,000 and \$19,973,000 for 2019 and 2018, respectively.

Plan Termination—While OPPD has not expressed any intent to terminate the Plan, it is free to do so at any time, by action of its Board of Directors, provided such action does not abrogate the terms of existing collective bargaining agreements. Should the Plan be terminated at some future time, any assets remaining in the Plan will be used solely to meet the Plan's obligation to provide benefits to or for the benefit of covered members and their beneficiaries.

3. NET OPEB LIABILITY

The net OPEB liability is the Plan's total OPEB liability determined in accordance with GASB 74, less the Plan's fiduciary net position. The total OPEB liability as of December 31, 2019 and 2018, respectively, is based on the results of an actuarial valuation date of January 1, 2019 and 2018, respectively, and rolled forward using generally accepted actuarial procedures. The Plan's net OPEB liability was \$257,672,000 and \$234,735,000 as of December 31, 2019 and 2018, respectively. The following table summarizes the components of the net OPEB liability, in thousands.

	2019	2018
Total OPEB liability	\$ 421,577	\$ 374,385
Plan fiduciary net position	<u>163,905</u>	<u>139,650</u>
Net OPEB liability	<u>\$ 257,672</u>	<u>\$ 234,735</u>
Plan fiduciary net position as a percentage of the total OPEB liability	38.88%	37.30%

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events in the future. Examples include assumptions about future employment, mortality and the health care

cost trends. The valuation amounts are subject to periodic revisions as actual results are compared with past assumptions and new estimates are made about the future.

The actuarial assumptions are based on a study of the experience of the covered group. The last actuarial expense study was performed during 2016. Other significant actuarial assumptions and methods used for the valuations on January 1, 2019 and 2018 were as follows:

- The actuarial cost method used was Entry Age Normal.
- Amortization for the initial unfunded actuarial accrued liability and OPEB Plan changes was determined using a period of 30 years and the increasing method at a rate of 3.0% per year.
- Amortization for all changes (including gains/losses, assumption and plan provisions) after the initial year were determined using a closed period of 15 years and the level dollar method.
- The pre-Medicare health care trend rates ranged from 6.8% immediate to 4.5% ultimate in 2019 and 7.1% immediate to 4.5% ultimate in 2018.
- The post-Medicare health care trend rates ranged from 11.6% immediate to 4.5% ultimate.
- The investment return (discount rate) used was 7.0%.
- The average rate of compensation increase varies by age, ranging from 13.0% down to 3.0%.
- The inflation rate used was 2.5%.
- The mortality table used for both healthy and disabled participants was the PUB-2010 general table with generational projection using Scale MP-2018 for 2019 and the RP-2014 Aggregate Table projected back to 2006 using Scale MP-2014 and projected forward using Scale MP-2017 with generational projection for 2018.

Discount Rate - The discount rate was determined using the expected long-term rate of return of each asset class, including inflation and additional yields due to active investment management. The projection of cash flows used to determine the discount rate assumed that OPPD contributions will be equal to the actuarially determined contribution rate. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on Plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

The following table summarizes the Target Allocation and Long-Term Expected Real Rate of Return, presented in geometric means, for each major Asset Class in the OPEB Plan.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return *
Global equity	50.0%	5.3%
Domestic fixed income	20.0	1.8
Real return	20.0	4.3
Private real estate	10.0	4.1
Total	<u>100%</u>	

*Based on 2019 forward looking capital market assumptions.

Sensitivity - The following table illustrates the impact of a 1% discount rate change on the Total OPEB Liability and the Net OPEB Liability as of December 31, 2019, in thousands.

	1% Decrease	Current Discount Rate	1% Increase
	6.00%	7.00%	8.00%
Total OPEB liability	\$ 472,405	\$ 421,577	\$ 379,302
Plan fiduciary net position	<u>(163,905)</u>	<u>(163,905)</u>	<u>(163,905)</u>
Net OPEB liability	<u>\$ 308,500</u>	<u>\$ 257,672</u>	<u>\$ 215,397</u>

The following table illustrates the impact of a 1% discount rate change on the Total OPEB Liability and the Net OPEB Liability as of December 31, 2018, in thousands.

	1% Decrease	Current Discount Rate	1% Increase
	6.00%	7.00%	8.00%
Total OPEB liability	\$ 419,427	\$ 374,385	\$ 336,903
Plan fiduciary net position	<u>(139,650)</u>	<u>(139,650)</u>	<u>(139,650)</u>
Net OPEB liability	<u>\$ 279,777</u>	<u>\$ 234,735</u>	<u>\$ 197,253</u>

The following table illustrates the impact of healthcare cost trend rate sensitivity on the Net OPEB Liability if it were calculated using 1% change in the healthcare cost trend rates as of December 31, 2019, in thousands.

	1% Decrease	Current Healthcare Cost Trend Rate	1% Increase
Pre-medicare	5.8%-3.5%	6.8%-4.5%	7.8%-5.5%
Post-medicare	10.6%-3.5%	11.6%-4.5%	12.6%-5.5%
Total OPEB liability	\$ 376,613	\$ 421,577	\$ 475,873
Plan fiduciary net position	(163,905)	(163,905)	(163,905)
Net OPEB liability	<u>\$ 212,708</u>	<u>\$ 257,672</u>	<u>\$ 311,968</u>

The following table illustrates the impact of healthcare cost trend rate sensitivity on the Net OPEB Liability if it were calculated using 1% change in the healthcare cost trend rates as of December 31, 2018, in thousands.

	1% Decrease	Current Healthcare Cost Trend Rate	1% Increase
Pre-medicare	6.1%-3.5%	7.1%-4.5%	8.1%-5.5%
Post-medicare	10.6%-3.5%	11.6%-4.5%	12.6%-5.5%
Total OPEB liability	\$ 333,999	\$ 374,385	\$ 423,289
Plan fiduciary net position	(139,650)	(139,650)	(139,650)
Net OPEB liability	<u>\$ 194,349</u>	<u>\$ 234,735</u>	<u>\$ 283,639</u>

4. INVESTMENTS

The Plan has a formal investment policy with specific financial objectives. The investment policy maintains diversification with the intent to minimize the risk of large losses to the Plan. Certain asset allocations are established for U.S. equities, non-U.S. equities and fixed income investments. The types of investments approved for purchase are specified in the policy and all investments are made according to the laws of the State of Nebraska. Plan performance is reviewed periodically with the investment managers. The investment managers are required to meet certain performance

standards measured against benchmarks. Investment managers that fail to meet these minimum standards are subject to termination.

The following table presents the fair value of investments as of December 31, 2019 and 2018 (dollar amounts in thousands):

	2019	2018
Money market fund	\$ 2,591	\$ 7,750
Total money market fund	<u>2,591</u>	<u>7,750</u>
Collective investment funds		
Wellington Global Opportunities Fund	82,103	65,052
Wellington Core Bond Fund	32,143	34,912
Prisa LP Fund	15,155	-
State Street Real Asset Non-Lending Fund	<u>32,117</u>	<u>32,328</u>
Total collective investment funds	<u>161,518</u>	<u>132,292</u>
Total investments	<u>\$ 164,109</u>	<u>\$ 140,042</u>

Money-weighted Rate of Return—As of December 31, 2019 and 2018, the money-weighted rate of return was 17.3% and (7.6)%, respectively. The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of OPEB plan investments by the proportion of time they are available to return during that period. External cash flows are determined on a monthly basis and are assumed to occur at the middle of each month. External cash inflows are netted with external cash outflows, resulting in a net external cash flow each month. The money-weighted rate of return is calculated net of investment expenses.

Credit Risk —The Plan’s investment in money market funds were rated Aaa-mf by Moody’s Investors Service and AAAM by Standard & Poor’s Rating Services for both years.

Custodial Credit Risk— Custodial credit risk is the risk that, in the event of the failure of a depository financial institution or counterparty to the transaction, the Plan will not be able to recover the value of its investment or collateral securities that are in the possession of an outside party. All investment securities are delivered under contractual trust agreements, maintained in the name of the Trust, and not in the title of a third party.

Concentration Risk— This is the risk of loss attributed to the magnitude of an entity’s investment in a single issuer. As of December 31, 2019 and 2018, there were no individually held investments that made up more than 5 percent of the Trust’s portfolio.

5. FAIR VALUE MEASUREMENTS

The Plan accounts for fair value in accordance with GASB Statement No. 72, *Fair Value Measurement and Application* (GASB 72), which defines fair value, establishes methods for measuring fair value by applying one of three observable valuation approaches

(market approach, income approach and cost approach) and establishes required disclosures about fair value measurements.

Fair value is the exchange price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date.

GASB 72 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in an active market for identical assets or liabilities and the lowest priority to unobservable inputs. Financial assets and liabilities are classified in their entirety based on the lowest level input that is significant to the fair value measurement. The three levels of fair value hierarchy defined in GASB 72 are as follows:

Level 1: Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs are other than quoted market prices in the active markets included in Level 1, which are either directly or indirectly observable for the asset or liability as of the reporting date. Level 2 inputs include the following:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3: Pricing inputs include significant inputs that are unobservable and cannot be corroborated by market data. Level 3 assets and liabilities are valued based on internally developed models and assumptions or methodologies using significant unobservable inputs.

The fair value of investments is externally provided by the trustee or the investment managers that manage the funds. The trustee utilizes third-party pricing services to assist in their valuations.

The following tables summarize in accordance with the fair value hierarchy the Plan's assets that are accounted for and reported at fair value on a recurring basis by level as of December 31, 2019 and 2018 (in thousands):

2019				
	Total	Level 1	Level 2	Level 3
Money market funds	<u>\$ 2,591</u>	<u>\$ 2,591</u>	<u>\$ -</u>	<u>\$ -</u>
Total fair value measurement by level	2,591	<u><u>\$ 2,591</u></u>	<u><u>\$ -</u></u>	<u><u>\$ -</u></u>
Investments measured at NAV				
Collective investment funds	<u>\$ 161,518</u>			
Total investments measured at fair value	<u>\$ 164,109</u>			

2018				
	Total	Level 1	Level 2	Level 3
Money market funds	<u>\$ 7,750</u>	<u>\$ 7,750</u>	<u>\$ -</u>	<u>\$ -</u>
Total fair value measurement by level	7,750	<u><u>\$ 7,750</u></u>	<u><u>\$ -</u></u>	<u><u>\$ -</u></u>
Investments measured at net asset value (NAV)				
Collective investment funds	<u>\$ 132,292</u>			
Total investments measured at fair value	<u>\$ 140,042</u>			

VALUATION METHODOLOGIES

Money Market Funds—The fair value of shares in money market funds is valued with an NAV of \$1, which approximates fair value. They are priced on inputs obtained from Bloomberg, a pricing service whose prices are obtained from direct feeds from exchanges that are either directly or indirectly observable and are categorized as Level 1 assets.

Investments Measured at NAV—The following tables summarize the fair value measurement of investments calculated at NAV per share (or its equivalent) as of December 31 (in thousands).

2019				
	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Collective investment funds	\$ 64,260	None	Daily	N/A
Collective investment funds	82,103	None	Monthly	10 Days
Collective investment funds	<u>15,155</u>	None	Quarterly	90 days
Total investments, measured at NAV	<u><u>\$161,518</u></u>			

2018

	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Collective investment funds	\$ 67,240	None	Daily	N/A
Collective investment funds	<u>65,052</u>	None	Monthly	10 Days
Total investments, measured at NAV	<u>\$132,292</u>			

Collective Investment Funds—These investments include collective investment funds that invest in equities, real assets, and fixed income securities including treasuries, agencies, corporate debt, and mortgage-backed securities. The fair value of these investments has been determined using the NAV per share (or its equivalent) of the investment.

6. INCOME TAX STATUS

The Plan is tax-exempt under Section 115 of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.
