

Where to Find Your Electric Lawn Serial Numbers

Serial number labels are meant to be permanent and made from materials that should last the lifetime of the equipment. Do not remove the serial number labels from your equipment for any reason – this will prevent you from obtaining warranty service or claiming rebates. Sometimes serial number labels are difficult to find or hidden.

This guide will outline common locations for serial number labels on most brands of equipment. The most common locations are fixed to the deck of the mower or inside the battery component area.
